THE BEAUTY IN OUR CAKE
is that its first taste induces another—very little, invites you to eat more. We make the best of plain and fancy cakes every day, specially to order if so required. You can have chocolate, citron, sponge, walnut or any kind of cake that you prefer and its quality never fails to give complete satisfaction. We make fine bread, too, the kind you snack your lips after, and we charge very moderately for all our pure products.

PIONEER BAKERY
207 South First Street

This store will be closed all day Labor Day, Monday, September 7th, E. W. FEE.

PREPARE FOR CLOVER STAND
Seed Should Not Be Sown Until It Has Been Given Germination Test—Good Plan Given.

In growing clover it is a matter of wisdom to sow only the best of seed. Do not sow the seed until it has been given a germination test. This can easily be made by means of two plates and a cotton cloth. Take several folds of a small piece of cotton cloth; thoroughly wet this and scatter between the folds a known number (several hundred) of the seeds to be planted. Place this on one plate and cover with another plate, bottom side up. See that the cloth is kept moist, not wet, and at the end of five or six days, determine the percentage of germination. Seed of poor vitality will not germinate at all; or, if it should, it will at least give weak plants that may not survive the season or the following winter.

The seed should be free from weed seeds and other adulteration. Buy seed only from reliable sources, and, so far as possible, use home-grown seed, when it is of strong vitality and known purity.

Easy to Improve Tomato.
It would not be easy to find a fruit that can be more rapidly improved by careful selection, or run out more rapidly by careless handling, than the tomato.
